

## Type 95 Series NTC Thermistors for Medical Applications

Thermometrics Type 95 Series NTC Thermistors are precision, solid state temperature sensors, providing high reliability and stability over an interchangeable range.

### Features

- Interchangeable NTC Chip Thermistor, which produces a tight interchangeable tolerance against our published resistance versus temperature curves.
- These thermistors exhibit excellent stability across the interchangeable range.
- Resin coating for mechanical strength and resistance to solvents.
- Flexible bare leads for the DC and EC style, and fully insulated leads for the TK style.

### Applications

- General patient probes
- Blood (fluid) analyzers
- Cleaning / disinfection
- Oxygenators
- General equipment
- Air temperature
