

# Cavli Wireless at a Glance

At Cavli Wireless, we are building the next generation of IoT connectivity management technology with our Proprietary line of intelligent hardware, network access solution and modem management cloud. We bring to market a unique line of eSIM integrated smart IoT modules that are pre-loaded with local LTE, LPWAN, 5G\* network connectivity and can be managed at scale with our flagship connectivity management platform solution - Cavli Hubble.

We work with Cellular network providers around the world to facilitate local connectivity, so that IoT product makers get to focus on what really matters to them - improving their customer experience, and undergo a hassle-free encounter of getting their devices smart connected.

## Cavli Value Proposition

Cavli Wireless brings together the three basic building blocks of IoT connectivity enablement, required to build & scale a 'Smart-Connected' solution/product across geographies in the most seamless & cost-effective manner possible.

## Cavli Corporate Highlights

**39+**

Use Cases

**100+**

IoT OEM Customers around the globe

**15+**

15+ eSIM integrated smart IoT modules

**25+**

Countries being served around the globe

**5G**

Upcoming 5G RedCap Modules  
Upcoming 5G NR/RedCap Modules

**Modem Intelligence**

Built in Hubble Stack Intelligence providing "smart" drop intelligence capabilities

**CaaS**

Connectivity as a Service Solution for Cellular IoT

## Sales and Partnerships

Get in touch with us to get onboarded on the future of IoT connectivity. If you are an IoT product maker trying to put together the building blocks of IoT connectivity management, let us help you figure it out. Our team of solution experts can get you from product development to launch in under 3 months.
